

FINLACTIC

Manufacturer number
1 for pioneers.

Finlactic Oy was founded in 2010. We are the manufacturer of preservatives and additives based on lactic acid. Our products are mainly used in pig and poultry farming. We have developed the LAKTA-series which includes for example following products:

PEKONI LAKTA-HAPPO

Formic acid free preservative for feed. Product is based on lactic acid.

PEKONI LAKTA-OPTIMI

Product is based on LAKTA-HAPPO and it is also formic acid free preservative for feed. The product includes also amino acids which are vital for protein synthesis.

LAKTA-AQUA

Additive for drinking water. The product will decrease the amount of harmful bacteria in the gut and prevents diarrhea.
